

CLARESHOLM REVIEW

VOLUME 10

CLARESHOLM ALTA, SEPT. 3rd 1914.

NO. 28

Special Course for Staff of the Agricultural Schools

The ministers of Agriculture of Education are co-operating to still further increase the efficiency of the Provincial Agricultural School. The teaching staff of the three institutions are staying in Ods during the month of September, for the purpose of standardizing the work in each of the special courses of instruction offered, and for the special consideration of the problems and methods of teaching. The variation in the age and previous educational attainment of the young men and women who enrol at the Agricultural Schools is so great that the problem of instruction is one of peculiar difficulty. The helpfulness of a professional course for those engaged as instructors is also fully recognized. It is these two considerations which have led the Government to make the necessary arrangements for this special course of one month's duration.

This is the first time on the continent that such a professional course has been given to the instructors in agricultural schools or colleges, and is other evidence of the fact that the Minister of Agriculture and The Board of Agricultural Education are determined that the instruction provided at the schools shall be as efficient as possible.

The course will be under the direction of Dr. C. Miller, Provisional Director of Technical Education, assisted by the Principals and Specialists from the Provincial Normal Schools.

Fire at Review Office

About fifty-three on the afternoon of Tuesday a fire broke out in the stock room of the Review office by some unknown source. Very little damage was done and what there was is entirely covered by insurance. The fire department was called and was ready for action in a very short time.

Retail Prices are Fair

Ottawa, Sept. 2.—Retail prices for foodstuffs throughout the Dominion as a whole show no cause for anxiety. Through its correspondence in different districts the labor department is keeping in close touch with the course of prices in every section.

Game Regulations

A book regarding the Game Act was received at this office to-day and is showing the following regarding the regulations for 1914.

Mountain sheep and goats
From Sept. 1st to Oct. 14
Deer, moose and Caribou
From Nov. 1st to Dec. 31
Ducks and swan
From Sept. 1st to Dec. 31
Cranes, rails, coots, snipes, etc.
From Sept. 1st to Dec. 31
Prairie chickens, partridge, etc.
From Oct. 1st to Nov. 30
Fox, mink, fisher and martin
From Nov. 1st to April 30
Otters and muskrats
From Nov. 1st to March 30

No ducks, swan, snipes, etc. to be placed in cold storage between Mar. 1st and Sept. 30th following.

No person shall export any animal or bird mentioned in the Game Act without a permit from the Minister of Agriculture.

No person shall wilfully disturb, destroy or take the eggs of any game bird, or other birds protected by the Game Act.

No dogs shall be used by any one to hunt big game.

Brutal Act of Austrians

Paris, via London, Sept. 2, 6:50 p.m. A dispatch from Petrograd (St. Petersburg) says the Novor Vnengy charges that during the bombardment of Belgrade the Austrians destroyed a humanitarian hospital over which the Red Cross flag was flying, killing one hundred children.

Men and women wanted in all localities no matter how small the village may be who are willing to work a few hours in their spare time showing sympathy to their friends and neighbors, position will pay \$15.00 weekly, simple meals with samples will be furnished free.

The Consumers Association, Windsor, Ontario.

Agricultural College

The following will be the courses of study for the Agricultural College for 1st year students and the table following shows the time each day that these studies will be taken up.

1. Field Husbandry.
2. Animal Husbandry.

3. Veterinary Science.
4. Farm Mechanics.
5. Farm Dairying.
6. Farm Management.
7. Horticulture. (Vegetable Gardening Floriculture).

8. Elementary Chemistry.
9. General Physics.
10. Botany.
11. Farm Management.
12. English.
13. Mathematics.

Claresholm and District

Don't forget Braten's Sale from Aug. 26th to September 12th.

The Rex Theatre is open every night and high glass pictures are being shown.

Jack Delaney was in town a couple of days this week on business for the John Deere firm.

Mr. S. Price who has been out of town all summer returned home on Wednesday night.

W. T. Rigby of Penitentiary, Ore. is in town this week looking over some land he has in this district.

Mr. J. R. Bernard of Lethbridge, Alberta spent a few days visit with his brother T. L. Bernard.

Mr. W. R. Shanks left on to-day train to spend a couple of days in Maeloch visiting with his mother.

Mr. J. D. McIntyre who was formerly manager of the Massey-Harris here is now in Calgary visiting with his family.

C. J. Brown's sale is still going on and the goods are selling fast and cheap so come right along and get your choice now.

Miss Hayward who will become a teacher at the school of Agriculture here visited town this week making preparations for the opening in Oct. Miss Hayward left on Wednesday to visit the school at Ods.

Mr. George Rounds returned yesterday evening from an extended visit and trip to Glacier Park and Great Falls, Mont.

Mr. D. B. Vinhorn took a car load of cattle to Calgary yesterday and the market was so poor that he had to sell at a sacrifice of \$35.00 on the car.

Mr. R. S. Breerton returned Thursday last from an extended visit with his parents at Nelson B.C.

Mr. Breerton met Mrs. Breerton in Maeloch with a car.

The big fairs tournament will take place tomorrow afternoon when some good fast teams will be witnessed in singles doubles and mixed doubles.

Owing to the present war the local tobacco dealers have been forced to raise the prices on tobacco because at the present time they have to pay very high prices for the wholesale dealers.

The prices of chickens have advanced very much but J. Edmond the photographer here has such a large supply on hand that it is doubtful whether he will change his prices, either him a sell.

The members of St. Andrews church choir (Presbyterian) are requested to attend the first regular service since the holidays to be held

Friday, Sept. 4th at 8 p.m. All the regular members are kindly requested to attend punctually. Any new or intending members desiring of joining will kindly notify the choir-master or attend the general practice on the first or any Friday evening. Gudecents, "The Holy City," Haynes "Seventh Mass," and Schubert's "Song of Moriam" will form the chief portion of the winter song together with the usual anthems selected from the standard and classic church music.

Preserving of Fruit By the House Wife

Not very many years ago, fruits of all kinds were regarded by the general public as pretty much of a luxury, something to grace the table on feast days and holidays, but now or less conspicuously absent from the ordinary list of fare. In these days when ketchup is being sold in the public schools and the fundamental rights of health are fully understood even by our children this old conception of the dietary value of fruit is rapidly being changed, and most people are beginning to realize that in these delicious products, nature has given us some of the most valuable of health preserving foods, and one whose more general and constant use would go far towards "stunning the door in the doctor's nose." Fruits of all kinds are rapidly approaching the standard of a staple article of food, and it is

Special Intercessory Version of The National Anthem

A copy of a special Intercessory version of the National Anthem for church and parochial use during the time of the National grave anxiety during the disastrous European war was received by post, from the publishers in London, England this morning by the Rev. H. M. Hodgeson. It has been suggested that this anthem, be used by all the congregations at the close of their Sunday services.

God save our gracious King,
Long live our noble King!
God save the King!
Send him victorious,
Happy and glorious,
Long to reign over us:
God save the King!

Tis choicest gifts in store
On him be pleased to pour,
And on our Queen;
Through all their earthly way,
Be Thou their strength and stay,
And ever bless, we pray,
Our King and Queen.

On bended knee, O Lord,
To-day, with one accord,
We pray that Thou
Make this dread war to cease;
Make world-wide love increase,
And give us lasting peace—
Lord, hear us now.

With truth and righteousness
Our widespread Empire bless;
Through Britain's vast domain,
Sing we the bold refrain,
"King George, long may he reign!"
God save the King!

Horror of War

What is the war about? Few know or understand. Our book "The Nation of Europe" gives the causes and issues of the greatest of all wars, unforgettably illustrated. Everybody wants to know why industry, commerce, finance shipping mails every activity all over the world, has been instantly stopped. Agents send 15c cost mailing order. Retail \$1.50.

Home Publishing House,
Box 94, St. John, F. B.

not only cranks and faddists who give them high place on their bill of fare.

The Alberta housewife has long been among those who appreciated the value of preserving fruits, especially in addition to the resources of her larder, and at the proper season, her commendable activities in this direction always result in the having any of delicate supplies of these choicest and wholesome delicacies for winter consumption. There is no doubt but that the clever housewives of this locality are no whit behind those in other parts of the province, and that this season, in spite of money stringency and war horrors they are looking forward to putting up a good store of delicious preserve pies and puddings. We would, therefore, especially commend to the attention of our readers, the advertisement of British Columbia preserving fruits, that appears in another column.

Our sister province right next door to us, as it were, has won an enviable reputation for the superior quality, grade and price of her fruits, extending a most remarkable series of gold medal awards in competition with the best fruit grown in the world, and the general excellence of her produce to say nothing of our natural sentiment in favor of Canada grain fruit should lead her to special consideration at our hands.

Remember that the principal British Columbia fruit-producing section, the Okanagan Valley, only twenty-four to thirty-six hours from us by express, and that this means to the market means that we get them ripened fruit, and all the luscious goodness and exquisite flavor that goes with tree-ripening.

It is impossible for fruit, grown locally to stand the transportation from more distant points, hence the line to equal these delicious products of our nearby sister province.

Safe Jumps of Eight or Nine Stories

Have Been Made.

At a recent fifty-story street frontment fire in New York that resulted in more of a smoke alarm than a blaze a man and his wife were seen to get out on the ledge of a fifth story window. The firemen tried to wait a moment, but there was no time to jump. The man cried that they were suffocating and most of the firemen stretched the net and shouted for them to jump. They were properly and jump one at a time. But even while the firemen were shouting the instructions the couple clung together, locked arms and wept. They came down straight and sure as a plummet right into the net. They rebounded about fifteen feet and fell in the net again in a sitting posture, still embraced.

The firemen let them gently down to the sidewalk. They still sat there long after each other independently. They were told there was not even a good fire to justify their jump. It had all been smoke from a smouldering lot of rags and other rubbish. The man and wife heard the news with expressions of wonder, thankfulness and commendation of their silliness.

Jumps of eight and nine stories without injuries have been recorded. The jump of the jumper is what counts. The fireman have to be treated for all kinds. Sometimes they have to shift a few inches before they are of the last indignity of distance shown by the jumper. But in most cases the leap to the net saves life—New York Sun.

A Little Play Badly Applied.

The play "The House of the Dead" was taken from the stage when the triumph was of the fourth. The evening before, accompanied by his friend Thorne, went to the theatre to see the play. Thorne, who was the place was being performed. Eugene Chatterer appearing as the man who had bought a box, but had hardly entered it when the superior looks forth in violent expressions about the "food managers." It seemed that the decorations had left in the box pots of oil and paint, and into these the audience had stepped. Wild with rage, he rushed from the house and on a scene of the worse was recognized in the lobby. No paper mentioned the incident, but by order of the manager the play was never produced again, and Chatterer never appeared again as the man of getting out of all on a scene of the point badly applied.

Theory and Practice.

Little Beatrice was taking home lessons and sitting at the table, doing something of theory. Like many other children, she disliked practicing her finger exercises. One day her mother, who was working in an upstairs room, noticed a sudden lull in the playing. She looked down and saw Beatrice sitting perfectly motionless.

"Beatrice, why don't you practice?" she called down sharply.

"I'm practicing, mother," replied the child with perfect self assurance.

"I'm practicing my theory," New York Sun.

ATLANTIS IS RECALLED

PROF. SCHLEIMANN'S SON NOW IN THE PUBLIC EYE.

Father of Diplomat Spent Years of His Life Excavating the Site of Ancient Troy and Came Upon Traces of the Long Lost Continents of Atlantis, Europe and America—Book Is In Prospect.

The recent appointment of Mr. Schleimann to represent the Greek Government at Washington, results the dream of his father, Heinrich Schleimann, of unearthing Troy, and the story of his fifty years of preparation for digging up the ancient ruins.

He was the son of a pastor with classic tastes, a grocer's boy at 10, a cabin boy, an underwriter, an English merchant. But from earliest childhood the story of the Trojan war had thrilled a consciousness of the future explorer. Of his earliest childhood he writes: "I was a boy of five when I heard of the Trojan war. I was so fascinated by the story of the Trojan war that I was always finding it in a warm defender of the Trojan war. With great zeal I heard him say that Troy had been completely destroyed, that it had disappeared without a trace. No joy may be imagined then, when I received as a Christmas gift a book with an engraving representing Troy in flames. The high walls and the Scæian Gate from which Aeneas was escaping were his father's.

"I cried out, Father, you must error! Here was a picture of a city which I was sure had not been completely destroyed; yet such ruins must remain, hidden in the dust of ages." He maintained the contrary, but I was of my opinion and at last we both agreed that I would one day excavate Troy.

At last, when I was 10 years old, I kept true to the dream of youth. But the story of how he realized that dream half a century later reads more like the chapters of a fantastic romance than any true biography.

Learning Russian, he was appointed agent of his company at St. Petersburg. Later he embarked in business of his own—the indigo trade. In the end of 55, he was able to retire on his income, and now devoted himself to the study of archaeology for ten years. At that time his fortune had increased to an income of approximately \$50,000 a year.

His trip through the Orient resulted in the writing of his first book, "The China of the Past," and in 1869, after a careful and extensive investigation in Greece, a second volume, "The Hellenic Civilization," was published.

After the publication of his second book, he had married a Greek woman of strong character, a notable scholar, and a woman who was very sympathetic with his aim, and aided him on such an extent that he considered himself as being greatly indebted to her.

In 1870, at the age of 48, having received the permission of the Sultan, through the office of the American Consul, he set out on his expedition. Some idea of the barriers presented by the Turkish authorities, and the excavator's story of the proceedings in his greatest book, "Ilios."

He had to break through a wall ten feet thick, containing large blocks of marble, most of which were from the Corinthian columns, and with lime. We then had to pile the wall of Lymnæa, and to force our way through the rubble of the wall from five to ten feet in thickness.

While making this excavation we found a number of large earthen jars from three to six feet high, as well as numerous drums of Corinthian columns and other sculptured blocks of marble. All these must have belonged to the Hellenic buildings.

Schleimann found the great edifice he called the "Temple of Ilion"—a building nearly 50 feet high. He also discovered the "Gates of the Gods" and the palace of the King.

The contributions made by the Schleimanns to the archaeological knowledge of the life of Greece and Turkey, and in addition, the improved light thrown on the Hellenic civilization by the material discovered, are almost innumerable, but not content with the work already accomplished, Schleimann turned his attention to the study of the ruins of Mycenæ and Tiryns.

Here we discovered the remains of the Minotaur, the royal tomb, and a vast number of priceless additions to the world's knowledge of archaic history.

Schleimann died in December, 1905, just before his sixtieth birthday. His wife knew that the conditions prescribed in his will, by granting to her the work already accomplished, and the work already accomplished, and the work already accomplished, and the work already accomplished.

There was a Change.
A Government Inspector, entering a rural post office, expressed surprise in finding a woman at the delivery window. "I was under the impression," he said, "that a man was in charge of this office."

"And so he was," replied the woman sharply, "but I married him."

LOCOMOTIVE INDUSTRY IN UNITED STATES

Serious Depression in This Trade—The Wilson Tariff Blamed For Decline

The Baldwin Locomotive Works in Philadelphia is probably one of the best known industries in the world. The present depression has hit it very hard, and it is therefore, that the recent depression, coupled with the reductions advanced by the Wilson Tariff of the United States, has caused a slowing down in these vast works.

Root of the Depression
Mr. Samuel H. Spurgeon, Vice-President of the Baldwin Locomotive Works, in an address delivered before the Annual Convention of the Master Builders' Association and the Associated Manufacturers' Supply Men's Association, May 28th, said that the new and greatly reduced tariff lay at the root of the present stagnation of business, and if this be carried to its logical conclusion, it will result in the loss of the United States to the European market.

Mr. Vanclain, who has made a special study of labor conditions abroad, said the average weekly wage of boiler makers in France is \$6.50, while in the Baldwin Works, the weekly average is \$15.50. The French product is just as well made as the American, he said. Six months ago, Mr. Vanclain said, the Baldwin Works had 15,000 men on its payroll. At present, 12,000 of these are looking for jobs.

Working Staff Reduced
A two-third reduction in the working staff of a huge plant such as this is well calculated to make all thoughtful men shudder at the wisdom of the tariff in trade. It is a record for nearly fifty years an unparalleled record for extension in industry as well as all other lines of activity has been manifest. Already there are many in the United States who predict a reaction from the tariff policy of the United States.

It is perhaps unfortunate from the President's standpoint that the reduction in the tariff synchronized with the trade depression, which is almost world-wide in its scope, but the fact remains that imports of manufactured goods into United States have greatly increased, notwithstanding the trade depression, while manufacturing has declined in corresponding or higher rate.

PRaises President FOR LOWERING TARIFF

Canadian Manufacturer Believes Excessive Tariff on Woollens, as in United States, Unnecessary

Among the few woollen industries in Canada that have been able to break under the competition from Great Britain, under the British preference is the Paton Manufacturing Company of Sherbrooke, Que., whose president and general manager, Mr. John Turnbull, is one of the best posted men on the woollen industry on this continent.

A recent interview in the "Journal of Commerce," Montreal, Mr. Turnbull is quoted as follows:

American Duties Excessive
"I do not go so high as protectionists. I think that in the present stage of Canada's industrial and commercial development, however, that a moderate tariff is not only desirable but essential for this country's progress. The woollen manufacturers of Canada are not extremists. They do not dream of pushing up the tariff on woollen goods to the height it reached in the United States as was the case with the Schedule K of the Payne Tariff Act."

"I have always thought the American high protective tariff indefensible as an economic, not to say a moral, standpoint. They have protective duties reaching the almost incredible figures of 150, and even 200 per cent. It was a heavy, almost intolerable, burden on the consumer; and a confession of incapacity on the part of the American producer that was shameful to every true American citizen."

"President Wilson is to be congratulated that he has understood the tariff duties on woollen goods were reduced to 35 per cent. ad valorem—quite sufficient, in my judgment, to permit the American manufacturer to compete with foreign producers not only in the United States but in the neutral markets of the world."

Favors 35 Per Cent. For Canada
"As far as Canada is concerned, we have never attempted to make the tariff a cloak for incompetency. We have fitted out our mills with the best and most modern machinery, and our men are well-manned them with the most skillful labor that could be secured; we

have secured Europe for the most expert and artistic designers. We are not making any demand for a further increase in the tariff, although, personally, I think that 35 per cent. would be a great help to the industry at the present crisis. Juncture, when high wages and high cost of materials have greatly increased the expenses of production. Does Not Mean High Prices.

"You think, Mr. Turnbull, that the present cost of 35 per cent. ad valorem means that prices are as a result higher to the consumer?"

"Emphatically, I do not. The competition offered by Canadian manufacturers materially adds to keep prices at a reasonable level. If our industries were closed out by the Canadian people, we would not have to wait long to see prices advance all along the line. We cannot do with less than 35 per cent. under that amount of protection and you wipe out the industry. That would mean higher prices in the end for the Canadian consumer. Hence, I maintain that a fair and reasonable amount of protection need not necessarily raise prices."

AID TO WOOL GROWERS

How the Dominion Department of Agriculture is Helping Wool Industry

Hitherto, Canadian wool has graded very low in comparison with wools from other countries through careless methods of shearing, shipping and sorting. The poor quality of Canadian wool has resulted in low prices to Canadian wool growers, and the Canadian wool manufacturer has been forced to take lower grades of wool. His wool supplies abroad because he was unable to get the proper quality in Canada.

According to the "Canadian Textile Journal" expert graders are being supplied by the branch mutual organizations of sheep-raisers at 10 or 12 cents a pound. Graders will classify and pack wool only and endeavor to see that it reaches dealers in the condition they graded it, but in no way will they act as selling agents for the growers. This should provide a means of stimulating breeders to take greater interest in the preparation of a clean product, for it is defined, understood that wool graded under the auspices of the brand will be severely, and impartially, treated.

In the announcement of this policy it is stated that fleeces fitted with binder ties, containing plain locks or wools with chaff and straw will be discarded to the rejection class and the locks plainly labeled as such. Foreign wools will be separated from the local wools into three grades: medium and low, and into combing and clothing lengths. Five grades will be used by the Eastern wool and wool of a medium character raised on the small farms in the West. Washed and unwashed will be carefully separated from each other. A uniform interest in the purpose and much interest is already being awakened amongst farmers throughout the country. The wool growers will act as the beginning of a wool grower appreciation of the real character of Canadian wools.

"Canadian manufacturers should endorse and encourage these efforts because any good accomplished will work to their benefit. They are able to give valuable assistance to the men who are carrying on the work in the way of information as to the best grades of wool for the industry here and by pointing out the defects and suggesting remedies."

At present the Canadian wool industry is in a depressed condition, owing chiefly to the general trade depression and also to the importation of British wools which are established to come into Canada freely under the low duties of the British preference. When business is pressed all over the world the British manufacturer finds Canada one of the weakest markets in which to dump his surplus product, and the result is that while there is less trade than ever to be shared by the Canadian and British woolen manufacturers the Canadian manufacturer loses a greater proportion than usual of what is going through the low prices which the British manufacturer is able to quote by reason of his low labor and factory costs.

In addition to the woe measures which the Government is taking for the promotion of the sheep industry, it seems reasonable that some change will have to be made whereby the Canadian woolen manufacturer will be assured of a greater percentage of the Canadian market for his product than he has at present. If such a policy was adopted the Canadian manufacturer would purchase still larger quantities of Canadian wools, and would help him help the wool grower.

Significant Progress

The figures below show more impressively than words the progress which the Union Bank of Canada is making. Consider them carefully.

PRICE ANNOUNCEMENT

Buyers to Share in Profits Lower Prices on Ford Cars
Prices effective from August 1, 1914, to August 1, 1915, and guaranteed against any reduction during that time.

Touring Car \$590
Runabout \$540
Town Car \$840

F. O. B. Ford, Ontario, fully equipped. In the Dominion of Canada only.

FURTHER, we agree to pay, as the buyer's share, from \$50 to \$60 per car on or about August 1, 1915, to every retail buyer in the Dominion of Canada, who purchases a new Ford car between August 1, 1914, and August 1, 1915, provided that he will share with the dealer the share of the profit which is available to obtain the maximum efficiency in his factory production and the minimum cost in our purchasing and sales department.

For further particulars regarding these low prices and profit-sharing plan, see the nearest Ford Branch or Ford dealer.

The Army of Constipation

In Growing Smaller Every Day, CARTER'S LITTLE LIVER PILLS are responsible—there's no other cause.

Constipation, the cause of all the ills of the body, is the most common of all ailments. It is the result of a sluggish liver, and it is the cause of all the ills of the body. It is the result of a sluggish liver, and it is the cause of all the ills of the body. It is the result of a sluggish liver, and it is the cause of all the ills of the body.

ALUM MAGIC BAKING POWDER

ENORMOUS GRAIN YIELDS

What French Agriculturists Are Doing

To Increase the Crops

French agriculturists are paying a

great deal of attention at present to

various methods of cultivation of

starch crops to increase the yield.

Various methods have already been worked

out, and it is now possible to produce

an increase of over 700,000 within a

period of one year. The principle is

simple, it consists in preparing the

soil in widely spaced rows of yellow

maize. At the end of two months

the maize is pulled up and the soil

is left in a loose up on the new

plants in such a manner as to provide

growth from all points brought into

contact with the soil. This method

has been used with great success in

France, and it is now being adopted

in other parts of the world.

To Make Salt Brads

Take one ounce of fine salt and

mix with one ounce of corn

starch and one-half cup of water.

Coloring and perfume may be added

if desired. Mix well and stir into hot

salt and wait until puffy. When cool

smooth. Put in a tin and let

stand for a day. The result is a
